

The following table is provided as a service for customers seeking the latest available data, and all information is subject to change. The table relies mainly on survey data obtained from the Energy Information Administration (EIA), but is supplemented by data from the Nuclear Regulatory Commission (NRC). The merging of the two sources may result in some inconsistencies with either. For example, if one survey contains fiscal month data and the other contains calendar month data-preference is given to calendar month. As soon as data is available for a new month, that data is used-regardless of whether EIA or NRC. Data users seeking the officially reported totals for either survey are referred to the EIA data reported in **table 8.1** of the Monthly Energy Review or to the **Nuclear Regulatory Commission**.

Monthly Nuclear Utility Generation by State, 2005 (Megawatt hours)

State	Capacity*	JAN	FEB	MAR	APR	MAY	JUNE	JULY	AUG	SEP	OCT	NOV	DEC	year-to-date
